

BVMM MANIFOLD MOUNT

2-and 3-Way models

3000/6000 PSI Working Pressure ~ Sizes from ¼" to 2"

Aluminum & Steel models dimensionally interchangeable ~ Near-zero leakage BVMMZ 3-way

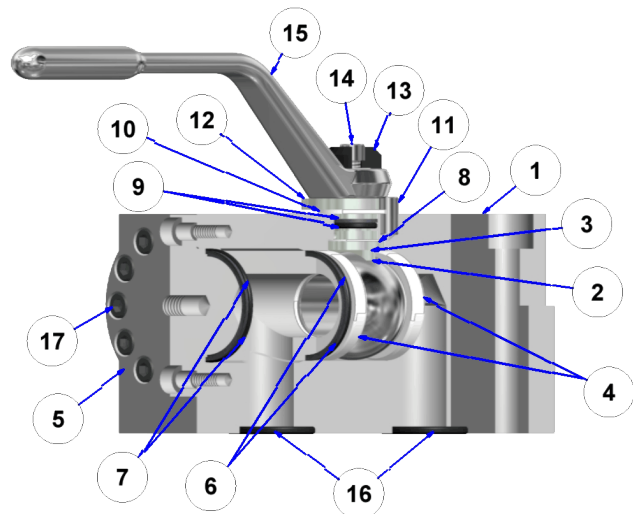

DMIC's re-engineered **BVMM** brings into the cost-competitive mainstream the possibility of surface mounting a High Pressure **2- or 3-Way** ball valve to your custom manifold, eliminating an external fluid connection and improving the integrity of your design. Choice of aluminum construction balances valve pressure characteristics with your selected manifold material. Exclusive and original DMIC design.

- Offered with "L-Bore" standard, "T" bore optional in 90° and 180° action
- **Made in our U.S. factory** for fast delivery in Steel (6000 PSI) and lightweight Aluminum model for 3000 PSI service
- **Single Bolt-On Plug Design** reduces pressure drop and valve cost
- **Near Zero leakage configurations, see notes on next page**

Ordering Codes Summary

Note: Changes from standard materials may result in changes to temperature and/or pressure rating. Also, carbon and stainless steel valves come standard with a steel crank handle; while an aluminum valve comes equipped with a aluminum crank handle.

Q: Can I use a Diverter Valve or do I need a True Multi-Way Valve?

A: The "BVMMZ" version of our diverter valve can take the place of a true multi way valve in many circuits.

Specifically, the question you must ask your application is: "Will pressure ever be applied at port 2 or 3 when the valve is blocked?"

If YES, you must use a "real" 3-way valve, or the "BVMMZ" model. If NO, a Diverter such as "BVMM" is acceptable.

Note: Manifold pad dimensions are the same in 2 + 3 way model. On 2-way, port 1 is not there.

Note: Dimensions A & D may change based upon accessory code choice.

Note: the "PIN" location on the pad diagram. This is the stop pin on the valve top. DMIC ships valves with the handle pointing opposite of the pin.
