Delaware Manufacturing Industries Corporation

## Replacement Notice for Standard DMIC Limit Switch

**Issue Date: 06/07/2018**

**Effective Date: 06/07/2018**

DM10166

**REPLACED BY**

SN9DM10166

### ITEMS AFFECTED:

For future orders of existing product, all items that were established with the DM10166 Limit Switch will be replaced by the SN9DM10166 Limit Switch. Any new items will be equipped with the SN9DM10166 by default.

### DESCRIPTION:

DMIC has decided to changeover the limit switch source for its standard SPDT Limit Switch. The changeover is intended to be a drop-in replacement and will function properly in all instances where the original switch was utilized. SN9DM10166 offers a degree of protection rating of IP65 where the original DM10166 offered a rating of IP66. All other features remain unaffected. For the rare instances that a DM10166 must be maintained DMIC is still able to offer it to our customers but special ordering instructions would need to be provided on a case-by-case scenario.
